can you tell me definition of arrival time

Ask

**Answer:** Arrival Time refers to the time at which a process arrives in the ready queue of the operating system, waiting to be assigned CPU time for execution. It is an important parameter in process scheduling, as it helps to determine the order in which processes will be executed based on their arrival.

give me summary of book in less than 200 words

Ask

**Answer:** "The Thirty-Nine Steps" by John Buchan follows Richard Hannay, a bored man who becomes embroiled in a conspiracy after meeting an American named Franklin Scudder, who claims to be in danger. Scudder reveals a plot involving international intrigue and the assassination of a key political figure, Karolides. After Scudder is murdered, Hannay goes on the run, evading both the police and the assassins who want to silence him. Hannay discovers Scudder's notebook, which contains clues leading to a mysterious group called the "Black Stone." As he races against time to prevent a major catastrophe related to a political meeting, he uses disguises and cunning to outsmart his pursuers. With the help of allies, including Sir Walter Bullivant, he uncovers a hidden agenda tied to high stakes international espionage. The plot culminates in a tension-filled confrontation at the coast, where Hannay aims to thwart the conspirators and save the day. The novel is a thrilling blend of adventure, espionage, and political intrigue set against the backdrop of pre-war Europe.
